Software Developer

B.Eng. Computer Science · Universidad del Azuay, Cuenca · 2022 – 2026
Spanish — native · English — intermediate (B1)

Live portfolio: interactive demos of every project (including private repos), case studies and architecture → **explorador-perfiles-github.netlify.app/en**

PROFILE

Computer Science Engineering student (Universidad del Azuay, graduating 2026) who builds and ships full-stack products end to end: from data model and API to UI, tests, Docker and production deployment. I have delivered systems used by real businesses (a jewelry factory ERP in production, a dental clinic management system, an e-commerce store) and I work daily with AI-assisted development and LLM integrations; co-author of a peer-reviewed paper on agentic AI workflows.

EXPERIENCE

Junior IT & Innovation Analyst · NovaCredit Banco Internacional — 2026

- Support the IT area on technology and innovation initiatives: process automation, evaluation of internal tools and technical documentation.

Freelance Full-Stack Developer · Independent — 2025 – 2026

- **Fénix Global ERP** — designed and built a production ERP for a jewelry factory (stage-based production, inventory by movements, purchases, sales, finance, reports). FastAPI + PostgreSQL + Next.js, deployed with Docker, nginx and TLS.
- **Beltà Collective** (beltàcollective.es) — built the e-commerce site: catalog, cart, payment gateways, UX/UI improvements and on-page SEO.
- Gathered requirements directly with business owners and wrote proposals for new modules (accounting, system expansion).

IT Systems Assistant · MASOLUC – Chamber of Commerce — Jun 2025 – Aug 2025

- Technical support, Active Directory implementation, hardware/software inventory, database migration and reporting.

Web Development Intern · IT Department, Universidad del Azuay — Feb 2025 – May 2025

- Built landing pages and reusable templates with Tailwind CSS and Drupal; fixed site-health issues and improved accessibility, navigation and SEO; presented results to the team.

PUBLICATIONS & AWARDS

Paper. Erazo-Garzón L., Chimbo J., **Ortiz R.**, Illescas L., Cedillo P. — "A Domain-Specific Language for Modeling and Implementing Agentic AI Workflows". Presented at ICI2ST 2026 (6th Int. Conference on Information Systems and Software Technologies, EPN, Quito); to appear in MDPI *Engineering Proceedings*. — Sep 2026

Award. Hult Prize at Universidad del Azuay — certificate as startup team member (PlantChain). — Feb 2026

SELECTED PROJECTS

PlantChain — Blockchain tree sponsorship (Hult Prize 2026) — live demo ↗
Smart contracts · Web app · Geolocation
Startup I competed with at the Hult Prize 2026 (Universidad del Azuay campus round): citizens of Cuenca sponsor urban trees by buying tokens, and every planting and care event is recorded on-chain for transparent, verifiable tracking.

Molaris — Dental clinic management system (private repo) — live demo ↗
NestJS · Prisma · PostgreSQL · Next.js · Tailwind · Docker · Jest/Vitest
Patient records, ICD-10 diagnosis, interactive odontogram, procedures, certificates and prescriptions. Turborepo monorepo; v2 is multi-tenant (one DB per clinic).

TaskKeep — Business task management (private repo) — live demo ↗
Next.js 16 · React 19 · Supabase · TanStack Query · Zod · Vercel
Multi-company task platform with roles, approvals, calendar, file handling via Google Drive and e-mail reminders.

Verbum — AI Bible app for older adults (private repo) — live demo ↗
React Native · Expo · Supabase · SQLite · AI video generation
Full Bible offline, semantic search and a daily AI-generated short video feed, with an accessibility-first interface (large type, simple navigation).

Primero en Leonida — Subscription giveaways platform (private repo) — live demo ↗
Next.js 15 · Supabase (Postgres, RLS) · Lemon Squeezy · Vitest
Verifiable monthly draws (public seed) and a community achievements game. Rules enforced in SQL with anti-cheat tests.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, Java, C++, PHP, SQL	**Frontend**	React, Next.js, React Native (Expo), Tailwind CSS, TanStack Query
Backend	Node.js, NestJS, Fastify, FastAPI, REST APIs, Prisma, SQLAlchemy	**Data**	PostgreSQL, Supabase, Redis, SQLite
DevOps	Git, Docker, nginx, Caddy, Vercel, Netlify, Render · tests: Jest, Vitest, Pytest	**AI**	LLM API integration, AI assistants, prompt engineering, AI-assisted development
